Product Info

- **Diamond Ceramic Exterior Protection:** The first ever long-term protective coating to combine nano diamonds with ceramic technology. The nano diamonds give unparalleled shine and reflection, creating a diamond brilliance finish. The ceramic forms a chemical bond to the surface for outstanding protection. The two technologies together result in a stunning appearance with high levels of gloss, slickness, and reflection.
- **All-In-One Interior Protection:** A concentrated polymer water-based system. Once cured, all interior surfaces are protected, excluding glass windows. Treated surfaces will repel oil, water and dirt without changing the appearance of the surface. The bonding of the polymer system is strong so treated surfaces will withstand numerous cleanings and is abrasion resistant. All-In-One Interior Protection also contains an updated UV ingredient which protects against cracking and fading. All treated surfaces will benefit from flame-retardant chemistry as well.
